Wipe with a slightly damp cloth and gently rub dry. A good proprietary hide food should be applied at least once a year and more often if the leather is in a dry atmosphere or close to a heat-source.

Do not remove any plastic parts or attempt to open the seating mechanism.

An EPD (Environmental Product Declaration) is a document that summarises a product's environmental performance. An EPD is based on a life cycle assessment (LCA). The requirements for how an EPD is determined are specified in the ISO 14025 standard. These standardised methods ensure that environmental information can be compared product by product, regardless of manufacturer, region or country. The GREENGUARD Indoor Air Quality Certification Program gives assurance that products designed for use in office environments and other indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors.
