

RH Activ

The RH Activ is our entry level chair. However, it is still packed with features and functions. The RH Activ is ergonomically designed through and through, is exceptionally flexible and easy to use.

The RH Activ's unique movements encourage core muscle activity, essentially benefiting the user with increased alertness and wellbeing. Furthermore, the Activ's simplicity and ease of use makes it the preferred product for most office set-ups, including desk sharing. The Activ can also be specified as a clean-room or ESD chair, which opens up a myriad of possibilities for this truly unique product.

The fact that it is also among the very best of environmentally sound chairs available makes this an even more compelling proposal.

DESIGNED FOR HUMAN PERFORMANCE

We engineer every RH chair for peak precision and performance. Your performance. An intelligently designed RH chair will optimise your posture and breathing, so you can always feel alert and perform at your best. Try an RH for yourself and experience the effects of over 30 years of precision engineering and ergonomic know how.

FUNCTIONAL DESIGN – Anatomical, innovative and functional performance

Precision ergonomics. Feature-rich functionality. Striking design deconstructed and reconstructed for performance. We engineer each RH Chair to targeted physiological and situational specifications. Our functions lead all our forms.

DYNAMIC ERGONOMICS – Proven human performance at the heart of our identity

Our rigorous research and testing methodology validates how an RH chair enhances individual and organisational performance. Our RH Performance Studies have demonstrated an increase in the baseline performance of all organisations who have taken part. Now, that's Return on Investment.

QUALITY – Performance and Quality are our Core

To increase customer performance we must consistently deliver products of unquestionable quality. We achieve this through the application of the exacting standards. Our 100% in-house concept to customer production flow, enables us to control every aspect from design and product development to assembly and logistics, in order to ensure a high performance quality.

ENVIRONMENT – Finding innovative ways for environmental performance

Our goal is the perpetual high performance of your people as well as the planet that we share. The result is long lasting recyclable products along with a low environmental impact upon our global home.

OUR PHILOSOPHY OF ERGONOMICS

At RH Chairs we have our own philosophy of ergonomics based on the two important principles of upright posture and active sitting. These principles improve breathing and circulation and stimulate the muscles. The philosophy is evident in the RH Activ movement, which ensures that your body receives the variation and support it requires as you move. Because the chair's basic settings do not change, this helps you to do more and perform better.

The height of the backrest can be adjusted with a simple push of a button.

The levers controlling the seat height, seat depth and the Activ movement are all located within easy reach on your right hand side.

Bases are available in several finishes in addition to the standard black aluminium. Choose between grey or polished aluminium.

Castors for both hard and soft floors are available. The chair can also be ordered with glides.

The backrest is available in two sizes. The tapered design provides freedom of movement for the user's arms, while the lumbar support provides optimum comfort for the user's back all day.

Armrests are optional but are recommended since they provide relief for the arms and shoulders. Two armrest variants are available. Both can be adjusted by height and width, one can also be adjusted by depth while the other can be rotated 360°.

The seat is made of moulded foam, which shapes itself to the body. The waterfall edge of the seat reduces pressure on the underside of the thighs, facilitating good circulation. The seat height is easily adjusted using the control lever on the right. As an option, the RH Activ 200 and 220 models can be equipped with a pad that is 30 mm thicker, which makes it particularly suitable at retail counters, for example.

Both the seat and backrest pads are easily exchanged. Should they become worn or soiled or if you want to change them for any other reason, you don't need to replace the entire chair. This increases longevity and greatly reduces cost of ownership, not to mention the great environmental benefits that this carries.

COMPLETE FLEXIBILITY

With its many models, options and accessories, RH Activ is our most flexible family of chairs. And naturally, we'll help you configure the best selection of chairs to suit your workplace and tasks.

EXCHANGEABLE PADS

The RH Activ is made to last. In order to increase longevity and reduce cost of ownership the seat and back pads can easily be replaced should they become worn or soiled. This benefits both your wallet and the environment.

AN ENVIRONMENTALLY INTELLIGENT CHAIR

Our objective is for all chairs from RH to be as kind to the environment as they are to the body. Consequently, the RH Activ is recyclable and many of its components are themselves made from recycled materials.

RH ACTIV ESD

The RH Activ ESD has been developed to suit electrostatic discharge environments (ESDs) and is approved in accordance with IEC 61340.

RH ACTIV CLEANROOM

For environments needing clean-room and Lab specification, RH can offer chairs that meet the international ISO 14644-1 standard.

EPD (ENVIRONMENTAL PRODUCT DECLARATION)

For some time, RH Chairs has issued environmental product declarations for its products and was the first chair manufacturer to obtain this international certification. The EPD covers the entire life-cycle of a product. From the extraction of raw materials, manufacturing, assembly, logistics and 15 years of use. In order to achieve an EPD, our suppliers are also be assessed in the same way, so that the total environmental impact of the product is evident in the environmental declaration.

TEN-YEAR GUARANTEE

We build chairs to withstand everyday use and to last for a long time. Before they leave our factory, they undergo rigorous quality control. This enables us to provide a full ten-year guarantee, so that you can feel completely secure with your purchase.

GREENGUARD

The RH Activ has been tested and certified in accordance with the GREENGUARD certification programme. This certification programme guarantees that all approved products intended for use in offices and other indoor environments meet strict chemical emissions limits, helping create healthy spaces.

RH Activ. A flexible range to suit anyone, anywhere

RH ACTIV 200

The RH Activ 200 has a medium seat with a waterfall front edge and a moulded back pad with good lumbar support. As standard, the chair has a black polyamide base and castors for soft floors. Also available in ESD and cleanroom versions.

RH ACTIV 202

The Activ 202 combines a large seat with a medium, moulded back pad and thorough lumbar support. The tapered back pad provides enhanced freedom of movement. As standard, the chair has a black polyamide base and castors for soft floors. Also available in an ESD version.

RH ACTIV 220

The RH Activ 220 also has a medium seat but its moulded back pad is larger than the 200 with pronounced lumbar support and is tapered for greater freedom of movement. As standard, the chair has a black polyamide base and castors for soft floors. Also available in cleanroom and ESD versions.

RH ACTIV 222

RH Activ 222 has a large seat and the large back pad with its pronounced lumbar support is tapered to provide enhanced freedom of movement. As standard, the chair has a black polyamide base and castors for soft floors. Also available in an ESD version.
